Compliance Checklist for Ray Baum's Act §506 and Kari's Law

Kari's Law Requirements:

		YES	NO
1.	Does your current 911 infrastructure notify relevant parties that an emergency call has been made via an organization provided PBX phone?	☐	☐
2.	Does your current 911 Notification provide the location of the device that dialed 911?	☐	☐
3.	Does your current 911 infrastructure allow for 911 calls to be placed without the need for an external digit prior to "911"? (ex. dial "9" for an outside line)	☐	☐

Ray Baum's Act (§506):

		YES	NO
4.	When you dial 911 from an organization PBX device do you send the building address with the call through the 911 network?	☐	☐
5.	When you dial 911 from an organization PBX device do you send additional information that allows the calling party to be located in a reasonable amount of time to the PSAP and on-site individuals?	☐	☐
6.	Does your organization contain multiple buildings or buildings with multiple floors that are listed under one address?	☐	☐

If you answered yes to the question above:

		YES	NO
6:1	Do you provide this additional location data (IE building, floor, or zone) with the 911 call?	☐	☐
6:2	Can the level of location detail you provide allow you and/or first responders the ability to find the caller in a reasonable amount of time?	☐	☐
7.	Do you have a way of updating associated device locations in the 911 records when devices are moved?	☐	☐
8.	Do you have a mechanism for knowing when devices move throughout the network so that the associated 911 records can be updated?	☐	☐
9.	If you have work from home employees who have an organization PBX device (softphone client on a laptop, or IP phone), are you currently provisioning their location data in the 911 networks?	☐	☐
10.	If you have employees that travel frequently and have an organization PBX device (softphone client on a laptop, or IP phone), are you currently provisioning their location data in the 911 network?	☐	☐

If you answered "**N**" to any of the questions above (aside from question 6), your PBX is likely not compliant with Kari's Law and/or the RAY BAUM'S Act §506. If you answered "**Y**" to all of these but would like to learn how to automate and validate these procedures, reducing your IT workload, as well as the additional benefits and savings obtainable by migrating to modern NG911 services, contact _____ to schedule a demonstration and free evaluation of your environment.
