

EDUCATION & SECURITY PREPAREDNESS DRILLS

Schools across the US are required to conduct emergency drills based on the schools' principals and administrators' assessment of threats and hazards most likely to impact their school. School requirements for drills differ from state to state, however, New Jersey state law requires every school to have at least one fire drill and one security drill each month. As threats continue to evolve it is necessary to practice these drills with students but also with your local first responders.

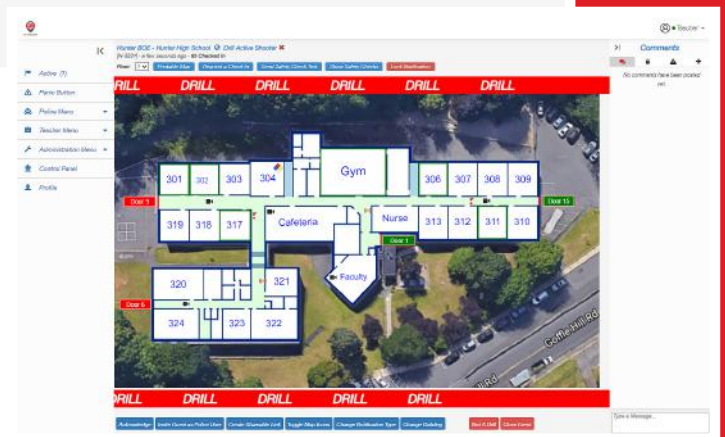

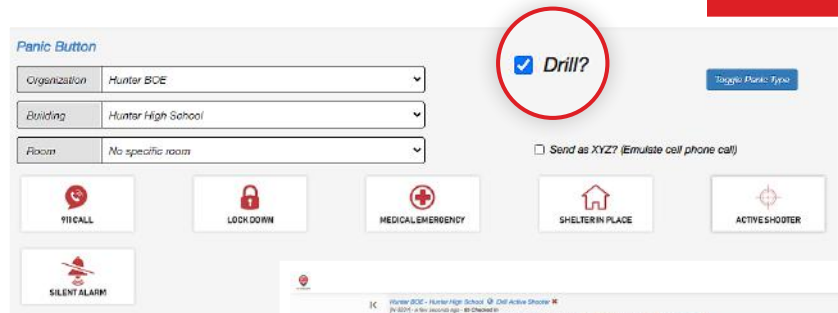

911inform provides schools the opportunity to conduct various safety drills to meet the requirements of any state law. Our Drill Mode feature allows administration to simulate multiple emergency situations sending notifications to all users in your organization as normal but will have DRILL scroll on the campus map. These are for internal use only and will not contact law enforcement.

A school district should contact local law enforcement if scheduling a standard notification test to inform them it is not a real emergency.

911inform Threat or Hazard Panic Button Features

- Lockdown
- Shelter in Place
- Bomb Threat
- Active Shooter
- Fire Evacuation
- A.L.I.C.E Protocol
- Non-Fire Evacuation

The Drill Mode feature easily prepares staff and students for worst case scenarios without exposing them to unnecessary trauma. 911inform is dedicated to making students feel safe in their environment.

911inform is customizable for every school district and can request any panic button to meet requirements by law.

Communicating Planned Drills

911inform has an Announcements feature that can be used to send out messages to any level user, student, and parent/guardian. This enables a district to alert all appropriate parties that a drill is scheduled and to be prepared to follow protocol. A principal or superintendent also have the capability to alert neighboring schools a drill will be taking place and not to be alarmed.

Features

- Create custom messages
 - Load old messages
- Schedule multiple messages or send instantly
- Messages sent via text, email, phone call (*select one or all three options*)
- Send to various users
 - Staff
 - Organization Level Staff
 - Students
 - Parents/Guardians
 - Active Staff/Students Only

The screenshot displays the 'Announcements' interface. At the top, there's a 'Group Maintenance' button. Below it, the 'Organization' is set to 'Hunter BOE'. A list of buildings is shown, with 'Hunter Elementary School' selected. The 'Staff' checkbox is checked, and 'Include Organization Level Staff?' is also checked. 'Students' and 'Active Staff/Students Only?' are unchecked. 'Parents/Guardians' is checked. The 'Groups' dropdown shows 'All Nurses' and 'Test'. The 'Staff Positions' dropdown shows 'Security', 'Subscriber', 'Super', 'Teacher', and 'Test'. The 'Send Now' radio button is selected, and 'Send in the Future' is unselected. The 'Message' field contains a text message: 'ATTENTION: We will be having an active shooter drill on February 15, 2022, at 10:50 a.m. Please inform students and follow all safety protocols. A speaker announcement will take place when the drill is completed. Thank you.' There are buttons for 'Load Message', 'Save Message', 'Delete Saved Message', and 'Send Announcement'.

Example

In NJ, Governor Murphy recently signed new legislation requiring age-appropriate school security drills which instructs school districts to provide written notification to the parent or guardian of a student enrolled in the district following completion of a school security drill no later than the end of the school day on which the school security drill is conducted. *Check your state legislation to see requirements on school security. [Click here for more info](#)*

School districts must document the date, time, and type of required drill and maintain that documentation in the school office. Varying by state, as a requirement school districts will annually track data on such measures and information and must be reported to the Commissioner of Education.

911inform records all actions and provides a full report to keep internally and available for download under the Reports menu.
